9. NOTIFICATION OF TARIFFS, FEES AND SERVICE CHARGES	47
10. IMPLEMENTING AND INTERFACTING OF THE POLICY	47

1. PREAMBLE

Whereas section 74 of the Local Government: Municipal Systems, 2000 (Act No.32 of 2000) requires a municipal council to adopt a tariff policy on the levying of fees for municipal services;

And whereas the tariff policy at least should include the principles in section 74(2);

And whereas the tariff policy may differentiate between different categories of users, debtors, service providers, service standards and geographical areas as long as such differentiations do not amount up to unfair discrimination;

Now therefore the Municipal Council of the Saldanha Bay Municipality adopts the following tariff policy:

2. DEFINITIONS

In this tariff policy, unless inconsistency with the context, a word or expressions to which a meaning in the Act has been attached means:

“break even” occurs where the volume sales are equal to the fix and variable cost associated with the provision of the service;

“capital contributions” means the tariffs payable in respect of the water, electricity, sewage, storm water, roads and refuse removal infrastructure of the municipality, and which amounts exclude amounts payable towards the operational and maintenance costs of such infrastructure.

“community service” are services that the Council has classified as such and the tariffs have been compiled with the intention that the costs of the services cannot be recovered fully from public service charges and are of a regulatory nature;

“councilor for financial matters” is the councilor of the municipal council responsible for financial matters as determined by the Act;

“economic services” are services that the Council has classified as such and the tariffs have been compiled with the intention that the total costs of the services are recovered from customers;

“fixed costs”: are costs which do not vary with consumption or volume produced.

“in-feed tariff” is the tariff at which the municipality could buy excess energy from small scale embedded generation:

“in season” refers to the period from the 1st December of a year up to 31 January of the following year and from the Monday before the Easter weekend up to and including Easter Monday;

“lifeline tariffs” is a unit charge calculated by dividing the total cost associated with the service by the volume consumed (units);

“municipality” means the municipality of Saldanha Bay established in terms of Section 12 of the Municipal Structures Act, 117 of 1998, and includes any political structure, political office bearer, duly authorised agent thereof or any employee thereof acting in connection with this by-law by virtue of a power vested in the municipality and delegated or sub-delegated to such political structure, political office bearer, agent or employee;

“municipal services” means *“municipal services”* as defined in section 1 of the Act, and includes a function or a combination of functions listed in Schedules 4B and 5B of The Constitution of the Republic of South Africa, 1996, and any other service rendered by the municipality;

“resident” is a person who is ordinary resident in the municipal area;

“service point” is a unique stand/plot where a municipal service is delivered or can be reasonably delivered;

“the Act” refers to the Local Government: Municipal Systems Act, 2000 (Act no 32 of 2000);

“Time of Use tariffs” are different rates for the specific components of the tariff that is applicable at different times of the day or for different seasons or periods of the year;

“total cost” is the sum of all fixed and variable costs associated with a service;

“trading services” are services that the Council has classified as trading services and the tariffs have been compiled with the intention that the Council makes a profit on the delivery of the services;

“two-part tariffs” are tariffs that are raised to cover the fixed and variable costs separately. The fixed costs are recovered by dividing the total fixed costs by the number of customers per category and the variable costs are recovered by dividing the total variable costs by the volume consumed;

“units consumed” are the number of units consumed of a particular service and are measured in terms of the units of measurement reflect in Section 6;

“variable costs” are these are costs that vary with consumption or volume produced.

3. PURPOSE OF THIS POLICY

The Saldanha Bay municipality wishes to achieve the following objectives by adopting this tariff policy –

- (a) To comply with the provisions of section 74 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000).
- (b) To prescribe procedures for calculating tariffs where the municipality wishes to appoint service providers in terms of section 76(b) of the Act.

4. TARIFF PRINCIPLES

The Saldanha Bay municipality puts it on record that the following tariff principles will apply.

- (a) Free services will only be possible if the National Government pay to the municipality an equitable share subsidy that covers the full costs of the free services.
- (b) All users of municipal services will be treated equitably. The various categories of customers will pay the same charges based on the same cost structure.
- (c) The amount payable by consumers will be in proportion to usage of the service.
- (d) Indigent households must at least have access to basic services through lifeline tariffs or direct subsidisation.
- (e) Tariffs must reflect the total cost of services.
- (f) Tariffs must be set at a level that facilitates the sustainability of services. Sustainability will be achieved by ensuring that:
 - (i) Cash inflows cover cash outflows. This means that sufficient provision for working capital and bad debts will be made.
 - (ii) Access to the capital market is maintained. This will be achieved by providing for the repayment of capital, maintaining sufficient liquidity levels and making profits on trading services.
- (g) Provision will be made in appropriate circumstances for a surcharge on a tariff. This will be required during a national disaster and periods of droughts when a restriction of usage is required.
- (h) Providing for penalties to prohibit exorbitant use will encourage efficient and effective use of resources.

- (i) The extent of subsidisation of tariffs for indigent households will be disclosed.
- (j) VAT is excluded from all tariffs and will be additional to these tariffs where applicable.
- (k) Unit of measurements. The unit of measurement as reflected in the below table will be used to determine regulatory community and subsidised services.
- (l) Method of calculation
 - (i) These tariffs will be adjusted annually by increasing the tariff that applied during the previous financial year by a percentage increase as determined by the majority councilors present at the meeting where the budget is approved.
 - (ii) Council may approve a new tariff that differs from area to area.

5. CATEGORIES OF CUSTOMERS

- (a) The tariff structure of the Saldanha Bay municipality makes provision for the following categories of customers/properties:
 - (i) Residential properties;
 - (ii) Residential accommodation business;
 - (iii) Residential nature reserve;
 - (iv) Residential Vacant
 - (v) Sectional Title Garage
 - (vi) Industrial properties;
 - (vii) Business and commercial properties;
 - (viii) Special Economic Zone
 - (ix) Agricultural properties (as defined in the property rates policy);
 - (x) Smallholding (as defined in the property rates policy)
 - (xi) Mining properties;
 - (xii) Properties owned by an organ of state;
 - (xiii) Public service infrastructure properties;
 - (xiv) Properties owned by public benefit organisations and used for specified
 - (xv) Public benefit activities;
 - (xvi) Properties used for multiple purposes, subject to section 9 of the Act; or
 - (xvii) Any other category of property as may be determined by the Minister, with the concurrence of the Minister of Finance, by notice in the Gazette.
- (b) Where there is a substantial difference between the infrastructure use to provide a service to a specific group of users within a category and/or standard of services provided, the Council can, after considering a report by the Municipal Manager or

the relevant Head of Department, determine differentiated tariffs for the different consumer within the specific category.

- (c) The differentiation must be based on one or more of the following elements: infrastructure costs, volume usage, availability, capacity and/or service standards.

6. CLASSIFICATION AND COST ELEMENTS

- (a) The Chief Financial Officer shall, subject to the guidelines provided by the National Treasury, make provision for the following classification of services.

(i) ***Trading services***

- Water; and
- Electricity.

(ii) ***Economic services***

- Refuse removal; and
- Sewage disposal.

(iii) ***Community services***

- Other Municipal services as described in schedules 4B and 5B of the Constitution of the Republic of South Africa.

(iv) ***Subsidised services***

- Services as described in Schedule 4A and 5A of the Constitution of the Republic of South Africa as per mutual agreement with Government.

- (b) Expenditure will be classified in terms of GRAP Standards.

- (c) Cost centres will be created to which the costs associated with providing the service can be allocated:

- (i) Department;
- (ii) Section/service; and
- (iii) Division/service.

- (d) The subjective classification of expenditure each with a unique line item will be applied to all cost centres.

- (e) The following cost elements will be used to calculate the tariffs of the different services:
- (i) *Fixed costs* which consist of the capital costs (interest and redemption) on external loans as well as internal advances and or depreciation whichever are applicable to the service and any other costs of a permanent nature as determined by the Council from time to time;
 - (ii) *Variable cost*: This includes all other variable costs that have reference to the service; and
 - (iii) *Total cost* is equal to the fixed cost plus variable cost.

7. TARIFF TYPES

In determining the type of tariff applicable to the type of service the Council shall make use of the following four options or a combination of the same:

- (a) ***Single tariff***: this tariff shall consist of a cost per unit consumed. All costs will be recovered through unit charges at the level where income and expenditure breaks even. Subject to a recommendation by the Chief Financial Officer the council may decide to approve profits on trading services during the budget meeting. Such profits will be added to the fixed and variable cost of the service for the purpose of calculating the tariffs.
- (b) ***Cost related two to four-part tariff***: this tariff shall consist of two to four parts. Management, capital, maintenance and operating costs and capacity costs may be recovered by grouping certain components together e.g. management, capital and maintenance costs may be grouped together and be recovered by a fixed charge, independent of consumption for all classes of consumers, while the variable costs may be recovered by a unit charge per unit consumed. Three and four part tariffs will be used to calculate the tariff for electricity and to provide for maximum demand, capacity and usage during limited demand.
- (c) ***Inclining block tariff***: this tariff is based on consumption levels being categorised into blocks, the tariff being determined and increased as consumption levels increase. This tariff will only be used to prohibit the exorbitant use of a commodity. The first step in the tariffs will be calculated at least break-even point. Subsequent steps will be calculated to yield profits and to discourage excessive use of the commodity.
- (d) ***Declining block tariff***: this tariff is the opposite of the inclining block tariff and decreases as consumption levels increase. The first step will be calculated by dividing the fix and variable cost and profit determined by council from time to time by the volume consumed.

- (e) **Regulating tariff:** this tariff is only of a regulatory nature and the municipality may recover the full or a portion of the cost associated with rendering the service.

8. UNIT OF MEASUREMENT AND METHODS OF CALCULATIONS

The following units of measurement will, where possible, be used to determine tariffs:

8.1 WATER SERVICES

- (a) Unit of measurement

Fixed tariff per service point plus a tariff per unit used (kilolitre used).

- (b) Method of calculation

- (i) The fixed costs of the service shall consist of the costs indicated as such by the council.
- (ii) The volume used by each category will be used to determine the pro-rata fixed cost of that specific category.
- (iii) The number of users in each category or the size and/or type of service connection will be used to determine the fixed costs of each category.
- (iv) The unit tariff will be calculated by dividing the variable cost by the volume used.
- (v) Where consumption cannot be measured the average consumption of the area will be used to calculate a fixed tariff will be charged.
- (vi) A consumer (service point) who is not connected to the water service but can reasonably be connected will pay an availability tariff.
- (vii) Fixed cost per consumer (service point) per category will be used as a basis to determine an availability charge per erf size. The following categories will be used:
 - 50% surcharge per erf between 0m² – 2000 m²
 - 100% surcharge per erf between 2001m² – 3000m²
 - 150% surcharge per erf between 3001m² – 4000m²
 - 200% surcharge per erf between 4001m² – 5000m²
 - 250% surcharge per erf above 5000m²
- (viii) Where council decide to make a profit on the service the profit will be added to the fixed and variable cost before tariffs are calculated.

(ix) Charges for SBIDZ will be as per agreement with Council.

When water restriction tariffs are to be implemented, Council may differentiate the percentages of the restriction between categories of consumers.

The following table reflects the application of tariffs to be applicable:

FUNCTION	UNITS OF RETURN
Testing of meters: Testing if 15mm or 20mm on consumer request	Fixed amount per test
Testing of meter larger than 20mm on consumer request by a professional institution	Actual costs per test
Provision of temporary meters and connection and disconnection pillar taps	Actual cost plus 20% plus water deposit
Reconnection costs: Reconnection after disconnection on consumer request	Actual cost of connection plus 20%
Reconnection of a supply after disconnection as a result of an infringement of council's by-laws.	Fixed amount plus all monies due for water and reconnection
Termination of supply on consumer request	1/12 of the annual basic service fees payable for each month without supply
Moving of a meter	Actual cost per moving of a meter 10% to pay in advance
Investigation of faults at a consumer's premises Faults repaired by council: Call out fees only from 08:00 to 16:00	Fixed amount per call out + actual cost of material + 20%
Call out fees where material and/or excavation is necessary (after hours)	Fixed amount per call out + actual cost of material + 20%

FUNCTION	UNITS OF RETURN
Sunday + public holidays	Fixed amount per call out + actual cost of material + 20%
When council's is called out, and on arrival discover that the consumer has already repaired the fault Between 08:00 and 16:30	Fixed amount per investigation
After working hours	Fixed amount per investigation
Sunday + public holidays	Fixed amount per investigation
Connection fees New connections – all connections larger than 20mm must be requested in writing 15 mm OD	Fixed amount per connection
20 mm OD	Fixed amount per connection
25 mm OD	Fixed amount per connection
40 mm OD	Fixed amount per connection
Larger than 40 mm OD	Actual amount +20%
Installation of meter with casing where the water pipe has already been laid to the erf 15 mm OD	Fixed amount per connection
20 mm OD	Fixed amount per connection
25 mm OD	Fixed amount per connection
Installation of a connection without a water meter 15 mm OD	Fixed amount per connection
20 mm OD	Fixed amount per connection
25 mm OD	Fixed amount per connection
Larger than 25 mm OD	Actual amount +20%
Inspection fees Where the main water pipe network is installed by private institutions on behalf of developers	Minimum fixed amount per hour paid up front or minimum fixed amount per hour where an account must be delivered

FUNCTION	UNITS OF RETURN
Mobile water delivery Transport of water inside working hours	Transport of water (per hour) with minimum fixed amount + amount of kl water at tariff determined by Council
Transport of water outside working hours	Fixed amount + amount of kl water at tariff determined by Council
Water collected by consumers at pillar tap is pre-payable	
Undeveloped service points (Availability fees)	Fixed amount per size of plot that is determined annually by council.
Capital Contributions	Cost determined by Council per Service
Other miscellaneous services not mentioned above	Cost determined by Council

8.2 ELECTRICITY SERVICES

(a) Unit of measurement

- (i) kWh – Active Energy.
- (ii) kVA – maximum demand (thermic or block) register in a half an hour period.
- (iii) Ampere or kVA – Capacity based on the connection size of the supply point

(b) Method of calculation

- (i) The guidelines issued by the National Electricity Regulator from time to time will form the basis of calculating tariffs.
- (ii) To recover the capital cost of supplying electricity through a fixed charge will make electricity unaffordable to many low consumption users. Cross subsidisation between and within categories of consumers will be allowed based on the load factors of the categories and consumers within the category. Portions of the fixed costs will be recovered through an energy or time-of-use charge. To apply the abovementioned principle, the cost allocation basis, cost

groupings, tariff components and tariff types reflected in the following tables will be used.

Tariff types	Capacity charge Rand/ Ampere/ month Or Rand/kVA/ month	Fixed charge Rands/ customer/ Month	Active Energy charge cents/ kWh	Demand charge Rands / kVA/ month
One part	X		X	
One-part Block Up to 4	X		X	
Two part	X	X	X	
Two Part Block Up to 4 blocks	X	X	X	
Three part	X	X	X	X

(iii) The one-part single energy rate tariff:

All costs allocated to a user category which will normally make use of a one-part single energy rate tariff will be expressed in a single cents/kWh charge. The recommended methodology for allocating costs into this tariff is as follows:

- The maximum demand costs (rands/ kVa/ month) of all consumers that will normally use a single tariff will be calculated by considering the average load factor of the type of these customers and added to the variable cost.
- The fixed cost rand/customer/month and the energy cost (kWh) will also be added to the variable cost.
- The total cost (maximum demand, fixed and energy costs) allocated to consumers which will normally use a one-part-single-energy tariff will be calculated at a least break-even point comparable with the number of kWh units determined by Eskom from time to time.
- The total cost will be expressed in a cents/kWh tariff.

(iv) The two-part tariff:

- A portion of the fixed cost equal to the operating and administrative cost of the Electricity Department will be recovered through a rands/user/month charge.

- The remaining portion of the fixed cost will be added to the variable cost and recovered through a unit charge (cent/kWh charge).
- The tariff then consists of a fixed monthly charge plus a variable charge related to metered kWh consumption.

(v) The three-part tariff:

- A portion of the fixed cost as described in section 2(b)(iv) will be recovered through a rand/ user/ month charge.
- The remaining portion of the fixed cost will be recovered through a unit charge (cent/kWh) and maximum demand charge (rand/kVa/month).
- A Portion of the maximum demand charge (rand/kVa cost) will be recovered through the unit charge.
- The cent/kWh charge therefore recovers the total variable cost plus portions of reallocated fixed and demand charges (rand/customer/month and rand/kVa costs).

(vi) Where council decide to make a profit on the service the profit will be added to the fixed and variable cost before tariffs are calculated.

(vii) Where a consumer (service point) is not connected to the electricity reticulation system but can reasonably be so connected, an availability tariff will be payable. The tariff will be calculated by adding a surcharge of 50% to the fixed costs applicable to connected consumers (service points) per category.

(viii) The structure of the time-of-use tariff will be calculated according to the purchase structure.

(ix) The time-of-use tariff will only be offered in areas where similar tariffs are available to the municipality.

(c) The following table reflects the application of tariffs to be applicable:

FUNCTION	UNITS OF RETURN
ELECTRICITY Meter reading	Fixed amount per reading
Deposit All Consumers	Fixed amount based on the value of the average of any two months' account subject to a minimum amount determined by Council.
SBIDZ	As per agreement

FUNCTION	UNITS OF RETURN
Reconnection fees: consumer's request	Fixed amount per disconnection
Reconnection fees: non payment	Fixed amount per disconnection
Testing of meters: Tested by council	Fixed amount per test
Tested by laboratory	Fixed amount + 15%
Cable connections Single phase cable connection up to erf boundary	Fixed amount per connection as determined
Single phase cable connection up to pillar box op overhead cable	Fixed amount per connection as determined
Three phase cable connection up to erf boundary or	Fixed amount per connection as determined
Three phase cable connection up to pillar box	Fixed amount per connection
Cable Costs: Single phase (16 mm ² Cu low voltage cable)	Fixed amount per meter
Three phase (16 mm ² Cu low voltage cable)	Fixed amount per meter
Conversion of single phase to pre-paid system	Fixed amount per conversion
Conversion of pre-paid system to conventional meter	Fixed amount per conversion
Fault detection fees: By municipal officials: During working hours After working hours	Fixed amount per inspection
Where municipal official is called out to repair a fault but on arrival discover that the consumer has already repaired the fault: During working hours	

FUNCTION	UNITS OF RETURN
After working hours	Fixed amount per inspection
Master circuit breakers Single phase Three phase Bulk consumers	Fixed amount per circuit-breakers
Minimum amount payable after disconnection	1/12 of annual minimum account for each month that no electricity was received
Availability fees: With or without improvements that are not connected	Fixed amount per size of plot that is determined annually by council.
Illegal tampering with meters All meters: First incident	Fixed amount determined by Council
Second and successive incidents	Fixed amount determined by Council
Pre-paid meters: - Negative current	Total cost of calculated arrear amount

8.3 REFUSE REMOVAL SERVICES

(a) Unit of measurement

- (i) Plastic bags per week (volume).
- (ii) Containers per week (volume).
- (iii) Vehicle load capacity (tonnage)

(b) Method of calculation

- (i) The volume refuse disposed by the various category consumers will be used to apportion the total cost as the service between the various categories consumers.
- (ii) The cost per unit of measurement will be determined by dividing the total costs of the service by the total volume of refuse disposed of during the year. The total cost of the service includes the removal cost plus the operating cost associated with the service.

- (iii) The cost associated with the removal of bulk containers will be determined by calculating how many of the smallest removal units will be absorbed by a specific container.
- (iv) A monthly rental for the usage of a bulk container will be applicable as determined by Council.
- (v) Opportunity costs for once-off removals will be calculated by recovering the costs of the volume removed plus a 20% surcharge. Discount will be provided for festivals, church and school events promoting recycling and stimulating local economy.
- (vi) An availability charge will be instituted on un-improved property. The availability charge for consumers (service points) is based on the recovery of the fixed cost of the service

The following table reflects the application of tariffs to be applicable:

FUNCTION	UNITS OF RETURN
REFUSE REMOVAL Within Municipal area: Payable in respect of collection, removal and disposal of refuse once a week: Single residential premises – 240L mobile bin system.	Fixed amount per month
Business- and industrial service points 240L Removal once a week 240L Removal twice a week 240L Removal 3 times a week 6000L “Skip” removal Removals after hours. Public holidays, Saturdays and Sundays.	Fixed amount Fixed amount Fixed amount Fixed amount per removal Additional amount per removal
Other service points 240L Removal once a week	Fixed amount
Special removals 240L or part thereof. Special containers Approval by specific department	Fixed amount per removal Stipulated amount and additional expenses

FUNCTION	UNITS OF RETURN
Amusement parks, circuses and similar entertainment undertakings Removal per 240L or part thereof.	Fixed amount per removal with a maximum discount of 75% to schools, churches and NGO's.
Rental of 6000L "Skip", no daily removal	Fixed amount per occasion
Removal of 6000L "Skip"	Fixed amount per removal with a maximum discount of 75% to schools, churches and NGO's
Garden refuse removal In mobile refuse bin with household refuse Removal by Municipality (Payable in advance)	Free of charge Fixed amount per removal
Other removals Motor car wreckage Request by occupant (payable in advance)	 Fixed amount per request per wreckage
Building rubble Removal of one 6000L "Skip"	 Fixed amount per removal
Informal housing Black bags	 Fixed amount (per month)
Cape Education Department Schools Discount Langebaanweg Removal of 240L once a week by means of mobile bin system	 5% on relevant service Fixed amount per removal
Availability charges for undeveloped service Points	Fixed amount per month Fixed amount per annum

FUNCTION	UNITS OF RETURN
REFUSE DUMPING SITE Per load capacity of the vehicle (GVM/Tara of vehicle) with a discount for clean builders- and garden rubble	Fixed amount per load
Refuse from other municipalities	Per ton as per agreement
Dumping of cat carcasses	Fixed amount per carcass
Dumping of dog carcasses	Fixed amount per carcass
Dumping of larger animal carcasses	Fixed amount per carcass
SBIDZ	As per agreement
Disposal of waste originated/outside the borders of the municipality	Fixed amount per ton or part thereof

8.4 SEWAGE AND EMPTYING OF CONSERVANCY TANKS

(a) Unit of measurement

- (i) Size of the erf.
- (ii) Number of cistern or urinals.
- (iii) Formula driven waterborne tariff.

(b) Method of calculation

- (i) All consumers (service points) for both (developed and undeveloped stands) will pay an availability charge based on the size of the erf and fixed cost associated with the service.
- (ii) Waterborne tariffs will be based on the variable cost of the service per category user, number of domestic consumers and/or the number of cisterns or urinals.
- (iv) The cost of emptying conservancy tanks will be based on the volume disposed and the cost associated therewith.
- (iv) Industries classified as WET industries shall pay over and above a fixed tariff based on the size of the erf waterborne tariff based on the following formula:

$C = V \{R + T (COD/1000)\}$ C = Treatment cost

V = Volume of Industrial effluent

R = Cost of conveying of 1 Kilolitre effluent

T = Cost or treating of 1kg COD

COD = Chemical oxygen requirement per mg per litre

(c) The following table reflects the application of tariffs to be applicable:

FUNCTION	UNITS OF RETURN
<u>SEWAGE</u>	
Single Residential, Sectional Title (separately valued flat let units), Old Age Homes, Sport Clubs, Halls and Community Organisations Developed service points (Availability and, flowing fees)	Fixed amount per size of plot that is determined annually by council.
Undeveloped service points (Availability fees)	Fixed amount per size of plot that is determined annually by council
Churches	
Developed service points (Availability and flowing fees)	Fixed amount per size of plot that is determined annually by council.
Undeveloped service points (Availability fees)	Fixed amount per size of plot that is determined annually by council
Commercial and Institutional	
Developed	Fixed amount per size of plot that is determined annually by council.
Availability fees	Fixed amount per toilet/urinal
Flowing tariff: Business and Industrial	Fixed amount per toilet/urinal.
Institutional	
Industrial Effluent Tariff	Per agreement with Industries
Undeveloped	
Availability fees	Fixed amount per size of plot that is determined annually by council.

FUNCTION	UNITS OF RETURN
Flats – Block valued in total (Excluding sectional title- separately valued Flat let Units) Availability fees Flowing tariff	Fixed amount per size of plot that is determined annually by council. Fixed amount per toilet/urinal
SBIDZ	As per agreement
Sundry Charges Maintenance of sewers and cleaning of blocked sewers. Mechanical opening by Council Monday-Friday: Normal Working Hours Monday-Friday: Outside Normal Working Hours. Saturday Sunday or public holiday Other Sewer Network but Council	Prepaid: Fixed amount Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Actual cost + 20%
High Pressure Jet opening by Council Monday-Friday: Normal Working Hours Monday-Friday: Outside Normal Working Hours. Saturday Sunday or public holiday	Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Fixed amount Prepaid: Not Applicable

FUNCTION	UNITS OF RETURN
Council called-out but blockage is already open. Monday-Friday: Normal Working Hours Monday-Friday: Outside Normal Working Hours. Saturday Sunday or public holiday Other Sewer Network but Council	Prepaid: Fixed amount Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Fixed amount Prepaid: Not Applicable Delivery of Account: Actual cost + 20%
Inspection Fees: Main Sewage Pipe Network (Installed by private organisation)	Prepaid: At office of City Treasurer Fixed amount per inspection Delivery of Account: Fixed amount per inspection.
Additions, alterations, re-construction subject to inspection	Fixed amount per examination payable in advance
Connection fees: Installation of 100mm O connection up to 4m long Sewage connections: Subsidised housing schemes Installation of any other connection Purified Sewage Water sales: Institutional consumers For sports Agriculture and smallholdings Industry and business	Fixed amount per installation Fixed amount per connection Actual cost + 20% Free Free Fixed amount per kilolitre Fixed amount per kilolitre

FUNCTION	UNITS OF RETURN
Chemical sewage waste: Dumping at Council's Sewage Purification Plants Increase in the number of toilets Disposal by private vacuum tankers at Council's Sewage Purification Plants	Fixed amount per unit per annum according to agreement Fixed amount per toilet per month or part of a month. Fixed amount per kilolitre
Sewage pumping Removal and disposal of sewage Flow All developed property with a dwelling on it that has been zoned according to regulations of the scheme All undeveloped plots: Availability fees	Fixed amount per annum with a maximum of 4 removals per month Fixed amount per year Fixed amount per kilolitre with minimum fixed amount for usage of system
All other developed plots After hours Pumping on Friday after 14:00, Saturday, Sunday or public holidays	Additional fixed amount per removal
Tuin Street erven: Hopefield Developed erven	Exempted of sewage removal availability fees Fixed amount per month to a maximum of four removals per month

8.5 OTHER SERVICES

The following table reflects the application of tariffs to be applicable:

FUNCTION	UNIT OF RETURN
DISPLAYING PAMPHLETS Application fees: Permanent advertisement signs Temporary advertisement signs	Fixed amount per application Fixed amount per application
Temporary advertisements, pamphlets and banners: Temporary posters Distribution of pamphlets Banners erected by council	Fixed amount per poster Fixed amount per 100 or part thereof Fixed amount per banner
Deposits: Permanent advertisement Temporary advertisement	Twice the monthly charges Fixed amount per poster
Removal costs: Temporary advertisement costs	Fixed amount per poster
ADMINISTRATION COSTS HOUSING Purchase contracts: housing schemes: When an application to purchase a housing scheme dwelling is approved	Fixed amount per application
Rental schemes: housing schemes: Income < R150 Income > R 150 per month	Fixed amount per month Fixed amount per month
Sales schemes: Per dwelling	Fixed amount per dwelling per month
Felling and trimming of trees on private property	Actual cost + 15% administration fees

FUNCTION	UNIT OF RETURN
CEMETERY FEES Grave-site fees: Residents Non-residents	Fixed amount per grave Fixed amount per grave
Reservation of graves (must be approved upon) Single grave: Resident Non-resident Double grave: Resident Non-resident Extra deep grave: Resident Non-resident	Fixed amount per grave Fixed amount per grave Fixed amount per grave Fixed amount per grave Fixed amount per grave Fixed amount per grave
Reservation of graves (not necessary for improvement): Single grave: Resident Single grave: Non-resident Double grave: Resident Double grave: Non-resident Extra deep grave: Resident Extra deep grave: Non-resident	Fixed amount per grave Fixed amount per grave Fixed amount per grave Fixed amount per grave Fixed amount per grave Fixed amount per grave
Improvement of graves: Single grave: Resident Single grave: Non-resident Double grave: Resident Double grave: Non-resident Extra deep grave: Resident Extra deep grave: Non-resident	Fixed amount per grave Fixed amount per grave Fixed amount per grave Fixed amount per grave Fixed amount per grave Fixed amount per grave
One grave site for burial and one grave reservation (not improved): Resident Non-resident	Fixed amount per reservation Fixed amount per reservation

FUNCTION	UNIT OF RETURN
Both graves improved, one grave-site for burial, one grave reservation: Resident Non-resident	Fixed amount per grave Fixed amount per grave
Children's graves Residents Non-resident	Fixed amount per grave Fixed amount per grave
Wall of remembrance (Urn may also be buried on loved one's grave) Residents Non-resident	Fixed amount per urn Fixed amount per urn
Wood topping for single grave	Fixed amount per wood topping
Grave closing fees: Residents Non-resident (Cost will differ for Saturdays, Sundays and	Fixed amount per occasion and fixed amount per hour Fixed amount per occasion and fixed amount per hour
HOUSING- RENTAL/ INTEREST RATES As prescribed in various circulars from the Department of National Housing Subsidised Housing Economic housing Contributions to Maintenance Fund Welfare housing	Basic rental plus interest per income category or basic rental per income category.
